Good Afternoon:

I finally had a chance to review Anthony's notes from our call last Friday and I have a couple comments:

- Regarding the proposed well nest locations #2 and #4, DNR believes that this will end up being reduced to one compromise location, due to access issues.
- Based on our discussion, DNR concurs with the proposed location #7. As Kristen pointed out, the four MIP borings in the southeastern area of investigation did not suggest groundwater impacts, so this would seem to be a low priority for permanent monitoring points.

I have also attached a couple articles that I came across regarding multilevel groundwater monitoring systems.

Please let me know if you have any questions. Have a great weekend.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Subject: tech meeting notes, 09 June 2017

All: I attached a summary of the discussion Friday morning, regarding additional Haskell Lake well installations recommended to WDNR by EPA and LDF. The 4th Thursday (22 June) was suggested for the next tech meeting. There was also some discussion of manager meetings to address different issues, but no dates were offered. Please confirm or arrange dates for either meeting and inform appropriate attendees. Thanks.

V/r,

Anthony Greenwater, Director
